

Weeden Engine, No. 38.

With the lamp half full of alcohol this engine will run fifteen or twenty minutes.

When unpacked stand the engine on its base and it is all ready to run.

To FILL THE LAMP. Remove the wick, fill the lamp about half full of alcohol, replace the wick and wipe off any alcohol spilled on top in filling, and the lamp is ready for use.

To FILL BOILER. Open the whistle valve so that the air in the boiler can pass out while filling it.

Unscrew the filler cap on top of the boiler and pour in clean water until the boiler is about one third full; replace the filler cap and screw it down firmly on its seat.

Place the lamp under the boiler before lighting; after lighting, in about two minutes, steam will be up; then start the balance wheel and the engine will work.

CAUTION.

Should the flame be too small to generate steam easily, pick it up higher so as to make a larger flame.

If your flame is good and your engine runs slow with but little steam, it is an indication that the water is out of the boiler. When this occurs, remove the lamp at once, or the dry boiler will become overheated and spoiled.

Avoid the use of dirty water, as by it the steam ports become clogged and your engine stopped.

Oil your engine occasionally at the bearings, and always clean it neatly after use.

Each engine has been tested by steam and is in good running order when it leaves the factory, and has been carefully packed. We feel confident that any boy who will study this simple explanation and follow our directions closely can set up and run our little engine without difficulty, and we trust he will derive both pleasure and instruction from its use.

PRICE LIST OF DUPLICATE PARTS.

Lamp,	10 Cents
Balance Wheel,	20 "
Cylinder with Piston, Nut and Spring,	25 "
Pulley,	10 "
Whistle,	15 "

The above duplicate parts can be obtained from any toy dealer, or will be forwarded from our factory, postpaid, to any address, on receipt of price.

WEEDEN MFG. CO., New Bedford, Mass.

NOTICE.

We will not be responsible for failure of this engine to run as guaranteed if other fuel than alcohol is used.
